

Introduction

Can a robot be a teacher?

In this workshop, young children (4-7) listen to a robot story, share their own opinions, and begin to think about fairness, kindness, and what makes people different from machines.

Key Goals

- **Think:** About fairness and kindness.
- **Speak:** Share simple opinions.
- **Listen:** Respect different ideas.
- **Create:** Design a robot teacher.

Resources

- **Story:** “My Teacher is a Robot”.
- **Visuals:** Robot pictures and simple videos.
- **Art:** Robot face templates and crayons.
- **Support:** Agree/disagree signs and open floor space.

Debate

Robots, Fairness & Feelings

**Co-funded by
the European Union**

Target Group: 4-7 y.o.
SmAile Project

Learning Outcomes

Knowledge:

- What robots are.
- That people can think differently.

Skills:

- Sharing ideas clearly.
- Listening and responding kindly.

Values

- Kindness.
- Fairness.
- Respect for others.

1. Story & Sharing

Think–Pair–Share: Children listen to a robot teacher story, talk with a partner, and say what felt good, strange, kind, or unfair.

2. Mini-Debate

Agree or Disagree: Children respond to simple statements and give short reasons using sentence starters.

3. Creative Reflection

Robot Design: Children color a robot face and explain whether their robot is helpful, happy, fair, or unkind.

Discussion: “What can a robot do well, and what does a real teacher do better?”
